

It is critical to the public's free access of opposing positions on issues that no one entity be able to monopolize the mass media in any markets. I urge you to restrict the media giants from consolidating their grip on the public's right to free and unfettered information. Do not allow single ownership of multiple print, TV and radio outlets in a media market. Better yet, break up what has taken place and restrict ownership to print OR television OR radio in each market. In addition, each media entity should be restricted, as they once were, to a limited number of outlets. The media mix can be varied, i.e., print, TV, radio, but no two in the same market. Thank you.
